Problem Statement

Title: Fintech

1. **Design an Autonomous Collective Finance System that reimagines chit funds as self-evolving, AI-governed financial entities capable of predicting, adapting, and optimising group savings behaviour in real time.**

2. **Build a decentralized lending platform. Create a system that enables secure lending and borrowing for individuals without access to formal banking. The platform should ensure trust, transparency, and dependable repayment without centralized control. Focus on solving identity, risk, and transaction challenges.**

Problem Statement

Title: Healthcare

1. **To develop an AI-powered interactive platform that educates spine patients about surgery & provides personalized physiotherapy guidance with real-time monitoring.**

2. **To develop an AI-powered rehabilitation system that tracks physical joint recovery & cognitive memory improvement while providing real-time feedback & progress analysis.**
